

## **Feeling sorry to quit!**

----Rev. John Mark (Wahab).

When someone feels sorry and sad, yet does continue involving in the same position that means presumptuously he does the same. The outward expression of his hatred is just to make blind the outsiders.

Every action must meet the goal, result or fruit; otherwise that would be futile effort.

In the field of evangelism, we must conduct our activities in such a way that the audience and recipients may understand, consider getting a different attitude over the subjects we discuss. The capsule or container of medicine must be melted away in the stomach that it can't act upon the bacteria. If in case capsule were not melted in the stomach, and ultimately gets out with the faces, then that would be futile treatment both for the patient and the doctor.

The evangelists must study both theology as well as the audience of his lecture. He should diagnose and prescribe medicament to make the sinners repentant, abhor the sinful acts and come back to the living Lord for regeneration. The Word of God is the best solution to redeem and protect the sinners against the attack of sin and Satan. True repentance is admitting what God says is true, and because it is true, to change our mind about our sins and about the Savior.

Unless we turn from our sins, we cannot put saving faith in Jesus Christ. God gives adamant sinners several chances to come back from the point of sin and deviation from the truth. If the truth makes someone free he is free indeed.

Though we all are saved by the grace of God, and not of our righteousness or good works, yet by faith we must swallow up the salvation wrought at the cost of the unblemished blood of the Lord Jesus Christ.
